KUPHANDA

Your offline school library

How to use this app

Kuphanda keeps the documents you need for Forms 1-4 on your phone, so a weak signal or a flat battery never stops a study session. Everything you highlight, bookmark or import stays on this device.

1. Find a document

Open Library and filter by form, subject or document type. Past papers, marking schemes, notes and syllabi all live in the same catalogue. Study guides are readable straight away.

2. Add the file

Catalogue records describe a document; they do not contain the file. Tap "Attach PDF" and choose the official paper from your device. Kuphanda copies it into its own folder, so the original can be deleted safely.

3. Read and record progress

Turn pages, add bookmarks and write a note on any page. Your place, pages read and study minutes are saved automatically. Progress is what your teacher sees against a class assignment.

4. Keep working offline

There is no login wall and no connection requirement. The app never uploads your notes unless you connect a school account.

Managing your documents

Where files live

Imported PDFs are copied into the app private folder. Nothing is moved or deleted from where you picked it. Removing a document from Kuphanda deletes only the app copy.

Attaching a file to a catalogue record

1. Open the record from Library.
2. Tap Attach PDF and pick the file.
3. Kuphanda verifies it is a PDF, stores the size and page count, and marks the record as available offline.

Importing a document that is not in the catalogue

Use My documents > Import PDF. Give it a title, subject, form and type so it can be found by search and used in assignments.

Bookmarks and notes

Bookmarks mark a page. Notes are text you attach to a page, for example a worked correction or a question for your teacher.
Both appear in the document detail screen and in My documents.

Storage

The storage card shows how much space Kuphanda is using. If the phone is full, remove papers you have finished; your progress and notes are kept even when the file is removed.

A note on copyright

Only add documents you are allowed to use. Past papers and textbooks remain the property of their publishers and MANEB.

WEEKLY STUDY PLANNER

Print this page or copy the blocks into your exercise book.

Week beginning: _____

Exam target: JCE / MSCE Year: _____

MONDAY

Focus subject: _____

Pages / questions: _____

TUESDAY

Focus subject: _____

Pages / questions: _____

WEDNESDAY

Focus subject: _____

Pages / questions: _____

THURSDAY

Focus subject: _____

Pages / questions: _____

FRIDAY

Focus subject: _____

Pages / questions: _____

SATURDAY

Past paper under timed conditions: _____

SUNDAY

Review mistakes from this week: _____

Before you start

Pick the paper before you sit down. Decide how many pages you will read and what you will do with them. A short, finished block beats a long, abandoned one.

A 40-minute block

5 min Recall what you already know about the topic.
20 min Read actively: one paragraph, then close the page and say it back in your own words.
10 min Answer two past-paper questions without notes.
5 min Mark them and write the correction in your own words.

Marking your own work

Use the marking scheme, not the model answer, to award marks. Write down every mark you lost and why: knowledge, method, or careless slip. Method marks are the quickest to recover.

Weekly review

Which subject got the least time? _____

Which topic still feels unclear? _____

What will you do differently next week? _____

Ask your teacher about one thing you could not resolve.
